Virginia Mason’s strong leadership and creative energy as keys to a great partnership, capable of uncovering effective approaches to obesity and other chronic illnesses that impact so many.

SCOTT CHARLESTON
Director of PR and Philanthropy for Verizon Wireless

"We see Virginia Mason’s strong leadership and creative energy as keys to a great partnership, capable of uncovering effective approaches to obesity and other chronic illnesses that impact so many."

EXCELLENCE FOR OBESE AND DISTRESSING PATIENTS AT VERIZON WIRELESS

A pilot study in the area of obesity and weight management recently partnered with Virginia Mason's Digestive Disease Institute to help fund a pilot study in the area of obesity and weight management. Philanthropy is a strong part of Verizon's culture. Since 2000, the company has donated to 156,000 non-profits and Verizon employees by giving 8.8 million volunteer hours. One of Verizon's main philanthropic focus areas is health care; specifically supporting the creation of a Center of Excellence for Overweight and Obese Patients at Virginia Mason's Digestive Disease Institute. The Center will provide a multi-specialty care team to coordinate an evidence-based, personalized approach to sustainable weight loss. The study will pull together information and review the success of support groups, healthy eating education, cooking and exercise tips, online support as well as guidance from medical experts.

Support from Verizon Wireless for this pilot study will not only help Virginia Mason patients improve their lives and health, but will also have a broader impact on the well-being of our entire community.
A Place for Reflection and Respite

In our journey to transform the delivery of health care for the patients we serve, we know how important the involvement of a patient’s family and loved ones is both in the care we provide and the overall healing process. To facilitate this while patients are in the hospital, each of our Jones Pavilion patient rooms have a separate space designed specifically for families and loved ones. This space allows them to be present, while also being comfortable and supported themselves.

As part of our new Oncology Unit on Level 18 of the Jones Pavilion, we added another element to support the families and loved ones of our patients. We created a meditation space, designed as a place of respite, quiet and solitude. Privacy screens allow patients and their families to pray or have time for personal reflection in a sheltered environment. In one section of the space, the flooring has been designed to point towards Mecca and a bar for a prayer mat has been included. The furniture, artwork, and special amenities have all been selected and fashioned for focus, peace, and balance. The view of downtown Seattle and Puget Sound also allows patients and their families to look outward while focusing inward.

This meditative space is made possible by the proceeds of the Virginia Mason Gift Shop, whose revenue is used to meet the needs of our patients. It opened together with the new Oncology Unit in early October.

Virginia Mason Celebrates Virginia Mason’s “Compassion”

Virginia Mason is honored to partner with Seattle-based company glassybaby, with the launch of the glassybaby titled “Compassion.” Lee Rhodes, founder of glassybaby, is a cancer survivor who found hope and comfort in the glowing warmth of candlelight during her treatments and recovery. That same hope, comfort and compassion is exactly what glassybaby sees in the care teams at Virginia Mason. A core value of glassybaby is giving back and supporting cancer patients and their families. Ten percent from the sale of each “Compassion” glassybaby will be donated to the Floyd and Delores Jones Cancer Institute at Virginia Mason and is available for purchase in the Gift Shop at the Virginia Mason Hospital & Seattle Medical Center or online at glassybaby.com/shop/glassybaby/compassion.

Virginia Mason to Offer Surgical Warranty

In early September, Virginia Mason announced it will be offering a surgical warranty on complete hip and knee replacements. As the first health system in Seattle, and one of the first in the United States to offer such a warranty, Virginia Mason’s program will help protect patients and their insurance companies or employers from incurring additional costs for treatment of surgery-related complications.

“Health care costs must be tamed,” said Gary S. Kaplan, MD, Chairman and CEO of Virginia Mason. “We view our surgical warranty as a significant step in that direction. Offering this assurance speaks to the skill of our surgeons and of our willingness as an organization to stand behind their work.”

The surgical warranty is part of a bundle-service contract available to insurance companies or employers from incurring additional costs for treatment of surgery-related complications.

Patient Safety Technology

Donor Support Brings Improved Patient Safety Technology

At Virginia Mason, patient safety is purposeful and the highest priority when serving our patients. Donor support is helping to take our vision of safety to the next level with improved reporting software. All Virginia Mason staff members are empowered to report safety concerns via a “Patient Safety Alert” (PSA). The concern can be anything from a tripping hazard to something more serious. These alerts are entered into an internal online database. Once an alert is submitted, an investigation is completed and corrective actions established.

The new reporting software will help take safety alert reporting at Virginia Mason to the next level. The new technology will make it easier and quicker for staff to submit alerts. Medical center leadership will be able to analyze the data and look for trends in real-time while responding faster to potential situations.

We are excited to implement this new technology system that will create even greater safety for the patients in our care. This would not be possible without the generosity of our donors and friends. We thank you for supporting our commitment to safety and to providing remarkable health care.

Boeing Classic Celebrates 10 Years

Scott Dunlap won this year’s Boeing Classic title in an exciting sudden-death playoff. The tournament had a record-breaking crowd of 94,000 spectators, and was supported by 1,000 volunteers, 64 of whom have helped all 10 years. Over the last decade, the Boeing Classic has raised more than $5 million dollars for local charities. This year’s proceeds will benefit the Benaroya Research Institute at Virginia Mason.

This year’s Boeing Classic added a new event called the Snoqualmie Showdown. The event was a tournament between Fred Couples/Steve Ballmer and Rick Neuheisel/Mitch Levy. Created in partnership with Sports Radio 950 KJR Radio and promoted by the Mitch in the Morning radio show, fans could purchase tickets to watch the showdown and bid on being an official scorer for the event. Jim Young, Virginia Mason Health System Board Chair had a winning bid to be a scorer.

Grapes on the Green 2014

Grapes on the Green drew a crowd of 300 guests to The Golf Club at Newcastle on August 22. This year, patient speakers Mary and Chuck Kastner shared how autoimmune diseases have impacted their lives, highlighting the importance of the work being done at the Benaroya Research Institute. The event raised a record-breaking $500,000 to support BRI’s mission to find the causes and cures to eliminate autoimmune diseases.
